

CAMPUS TRANSFORMATION:

■ C.3 “UNIVERSITY-CITY SYNERGIES AND RECLASSIFICATION OF HERITAGE”

Description:

- Reinforce the links between University and City as unified transformation criteria in the evolution towards excellence, which will be applied in the ULL and ULPGC in accordance with the specific characteristics of each campus.

Objectives:

- Increase the degree of urbanistic and social integration of the ULL and ULPGC
In their respective socio-urban contexts – Intensification of the Third mission
- Reinforcement of the active presence of university members and spaces in socio-urban contexts in which they can promote innovation, calling, to this end, on other Institutions to join the global socio-cultural project (Town Councils, Island Councils Canary Islands Government, etc.).
- Economic and social development and promotion of employment in areas lying adjacent to the different campuses of the ULL and ULPGC
- Conversion of historical old towns of the Canary Islands into university campuses
- Increase functional sustainability, through joint planning and use of equipment, resources and infrastructure between University and City, in order to optimize investments, increase their use and economize on maintenance.
