

SCIENTIFIC IMPROVEMENT:

■ TRI-CONTINENTAL ACTIVITIES

B1: Tri-continental Open Science Programme

Description:

- Programme aimed at generation tri-continental open research projects with three partners:
 - o The Canary Islands and Europe + Africa + Latin-America
- Projects mainly within those specialized thematic fields of the Tri-continental Atlantic Campus:
 - o Sea-related fields: Marine (Marine Science and Technology), Maritime (Tourism, Sea-related economics-Mobility-Logistics)
 - o Astrophysics
 - o Biomedicine at the Service of Development Cooperation Development Cooperation
- Campus projects will only be admitted if their initial partners are European centres or Spanish centres with European partners.
- The programme will be run from the Tri-continental Atlantic Campus body.

Objectives:

- To promote the tri-continental research network concentrating on the specialized fields in which the two universities already work at the highest level
- To promote inter-university research
- To attract tri-continental research talent
- To promote the transfer of research results to tri-continental business projects.
